“OTHERS TALK... WE STOCK.”

2018 LINE CARD

Have you ever added up exactly what your Industrial Distributor does for you?

Here are just a few—of many—services your dependable supplier offers you daily...

◀ **Lowers your purchasing costs!**
Simplifies buying. One interview with one salesman . . . one order to one reliable source gets you the finest products of leading manufacturers.

▶ **Cuts your inventory investment!**
Frees capital for other purposes. Without your distributor, you would tie up 15 to 35% more dollars . . . require 1/3 more storage space.

◀ **Simplifies your inventory keeping!**
Prevents stock obsolescence. Guards against serious inventory shrinkage.

▶ **Reduces delivery costs!**
One shipment in one truck saves on f.o.b. factory items. Eliminates receiving dock jams.

◀ **Eliminates paperwork!**
How long would it take to write an order to each manufacturer whose products you use? To check receiving slips? To pay hundreds of invoices?

▶ **Clears your desk for important work!**
Worries vanish when you are sure your supplier will supply you the right product — at the right time — at the right price.

◀ **Adds productive hours to your working day!**
Eliminates need for testing new products. Your distributor investigates before offering them to you.

▶ **Keeps your production rolling!**
Your distributor delivers quick to all plant departments. Gives emergency service when needed.

Yours may be one of America's most efficient, hard-working organizations . . .
But . . . if all industrial distributors were to go out of business today, your ordering, handling, stocking costs would jump at least 20%.
